If you have concerns about stretch marks, loose skin or areas of excess fat, our advanced 3D Lipo technology treatments can definitely help you.

## WHAT IS 3D LIPO, AND WHAT CAN IT DO FOR ME?

3D-Lipo is a powerful non-surgical approach to liposuction.

The 3D treatment involves different options and methods for destroying fat cells and improving the appearance of problem areas. The 3D Lipo machine uses Cavitation, Cryolipolysis and Radio Frequency technologies to achieve transformative results.

Combining the treatments can mean less fat, tighter skin and less cellulite in treated areas.
